

FOR IMMEDIATE RELEASE

Global Vision Technologies Launches FAMCare Lite – SAAS, Streamlined Case Management Solution

Atlanta GA – May 8th, 2009 Global Vision Technologies (GVT) announced today the release of [FAMCare Lite](#), GVT's answer to easy-to-use and affordable [child welfare and human services case management software](#). "FAMCare Lite is the perfect case management solution for agencies that don't have the I.T., systems or resources to run an enterprise-level case management system. It's 100% web-based and fully hosted. There are no set up fees – users can sign up and start using the system immediately," said George Ritacco, Executive Director Client Services at GVT.

GVT developed the FAMCare enterprise platform in 1997. At that time – FAMCare was the only human services case management application that was actually *web-based*. FAMCare allowed caseworkers and their supervisors the ability to access their system from any location with an Internet connection, which translated to improved productivity on many levels. FAMCare went on to become a leading provider of child welfare and juvenile justice management software for larger organizations.

With FAMCare Lite, GVT has contributed something to the community of caseworkers - that is cost effective and promises to deliver a high ROI. "A system like FAMCare Lite that is rich with solid features and reporting, easy-to-use forms, and affordably priced, makes it a real viable information management tool especially now when organizations are feeling the "tightening" and "toughness" of our current economy," said Ritacco.

According to GVT – adopters of FAMCare Lite do not need to build the system infrastructure to manage the application. Nor do they need to worry about system maintenance, backups, bandwidth or hosting. The hosting, data and infrastructure is managed and maintained by the GVT team allowing users more time to concentrate on managing their operation and taking care of the kids and families under their care. "The system is simple enough for caseworkers from various disciplines: child welfare, juvenile justice, adult protective services, detention, substance abuse facilities, domestic violence treatment facilities and others - to start using immediately to track their information," said Ritacco.

Some of the benefits include:

- Solid Reporting and Tracking Metrics.
- Instant Access to Critical Data
- Mobile Technology Access
- Collaborative Case Management and Monitoring
- Staff Management / Dashboard
- Customizable Treatment Plans
- Flexible Forms and Fields
- Full Legal and Medical Tracking History – HIPAA Compliant

The system is completely scalable, so larger organizations can grow beyond the Lite version and incorporate more modules and customizations as their needs change. "Our goal with FAMCare Lite was to make advanced case management, easy to adopt and leverage - for all of our friends in need of [child welfare software](#) or human services software," continued Ritacco.
